

SEMPERGREEN®

# SEDUMMIX BLANKET TYPE N

## MATERIAL

The Sempergreen® Sedum-mix blankets Type N comprise six different species of Sedum. The plants grow on a coconut fibre carrier and a special substrate developed by Sempergreen®. The blankets boast at least 95% coverage upon delivery. Sempergreen® vegetation blankets are produced in accordance with FLL guidelines.

## ABOUT THE VEGETATION

The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions.

## INSTALLATION AND MAINTENANCE

Sempergreen® vegetation blankets are very easy to install (download the installation instructions from our website!). Sedum-mix blankets can be installed on sloping surfaces of up to 25 degrees. Their (minimum) maintenance depends on the build-up of the system (fertilise one to three times per year).
