

hanit® L-STONE CORNER

The perfect finish

L-stones are true multi-talents. In the garden, they can take on a wide variety of tasks and can be used, for example, as borders for flower and vegetable beds, for slope stabilization or as a wall. Our L-stones made of recycled plastic also have the great advantage that they are much lighter than concrete L-bricks. With our system extension of the L-stone corner, clean finishes and corner formations can be easily realised. And of course the new L-stone corner is available in all sizes and colours to match our L-stones.

Material:

hanit® Recycled Plastic

Surface:

Structured, grained

Ausführung:

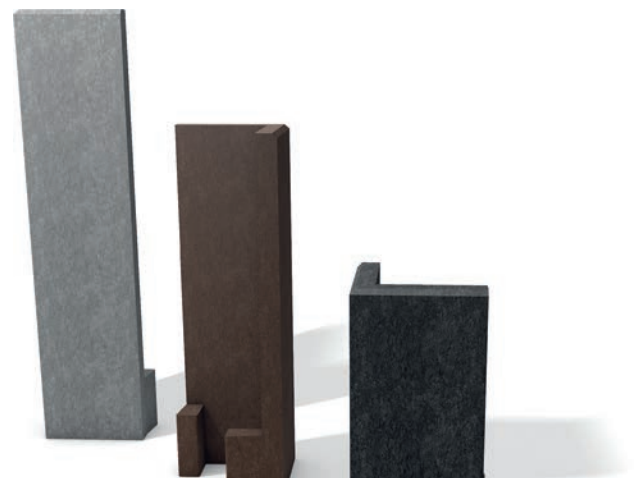

Top edge bevelled on one side
Without reinforcement
Wall thickness 4.5 cm

Load class:

Loadcase 5 KN/m²

Advantages:

Low weight (ca. 2/3 lighter than concrete)
Installable without heavy equipment
Weather-proof
Simple installation
Perfect system extension
Screws for fixing are included

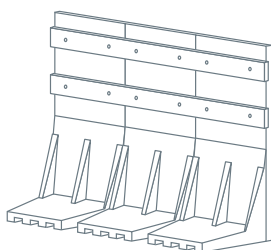

Grey Brown Black

SCHEMATIC INSTALLATION

To ensure an installation in true alignment, we recommend to screw L-stones to each other using our 3 x 10 x 280 cm board profile according to the installation recommendation.

TECHNICAL DATA

25.0 x 25.0 cm

Colour	Height (cm)	Weight (approx. kg)	Order No	Qty/Pal	Weight/Pal (approx. kg)
